Exhibitors in this division will be assigned a task for their robots to perform. The tasks are changed annually. Please visit the SpaceTech website www.kansas4h.org/spacetech for the current year's task.

4-H ROCKETRY

Special Rules

1. Read General Rules. Pre-enter by June 30.
2. Consultation judging is offered from 2:00-7:00 p.m., Tuesday, August 3, but not required in this division.
3. Criteria for exhibiting and judging in this division are available at the Douglas County Extension Office.
4. Each exhibitor may enter one rocket per class that has been constructed during the current year. If more than one rocket is entered, one must be a "kit" and the second may be entered into any other applicable class. An exhibitor may not enter two rockets in the same class. To exhibit in this division, the rocket must have been flown. Support rods must not extend past the tip of the highest nosecone on the model. Support rods must remain in the upright position, do not angle. No model may be submitted on a launch pad.
5. The report that accompanies the rocket must be limited to the 4-H Rocket Exhibit Information Form which is glued to a 10" x 13" envelope.
6. Plans (or a photocopy of) must be placed inside an envelope. This includes original design rockets. If a rocket kit has been modified structurally, notations need to be given that indicate the changes made. One or more photographs of the rocket at the launch site are required. Photograph showing rocket at the moment of ignition is preferred. Photograph(s) should be mounted on one single-sided 8 1/2" x 11" page. There are to be at least 1 page of photos and no more than 5 pages of photos.
7. For original design rockets, one extra page of photographs may be added to show unusual construction or other important features. Describe in summary how model was tested for stability prior to flying.
8. The altitude achieved by the model is to be determined using a method other than estimation. Examples of accepted methods include altimeter, computer software, range finders, etc.

GENERAL CONSTRUCTION RULES

9. Angles of the fins must fall within a plus or minus 2 degrees variation.
10. Exhibit must be uniformly painted, smoothly finished, have decals applied smoothly. Fins should be rounded or streamlined. Fins and body tubes are to be sealed to eliminate the appearance of body grooves and wood grain. Any seams on plastic parts are to be sanded smooth. The rocket is to be properly assembled. Fins and launch lugs are to be filleted to reduce drag and properly secure them to the model. The nose cone is to fit snugly but still allow for easy removal.

11. Models may not be judged based on their paint scheme, with the exception of rockets that fit the definition of a scale model. They may be judged based on the paint scheme. Under no circumstances is the weight given to the paint scheme to be sufficient enough, by itself, to move the model from one ribbon placing to another.
12. Flight damage is to be documented by the participant. The judging of flight damage is to be secondary to all other aspects of the model and only then may it even be considered.
13. Beginner kits with prefabricated plastic fin assemblies and pre-finished rockets requiring no painting are NOT acceptable.
14. Original design rockets cannot be a modification of a pre-existing kit and must be of original design.
15. Multi-stage rockets can be flown using just the final stage and be considered fully flown.
16. Engines and igniter are not permitted with the exhibit and constitute an immediate disqualification. The only exception to this is the use of a "spent" engine as a permanently affixed structural component of a display base. When a "spent" engine is used in this manner the casing must be completely hollow from one end of the "spent" engine to the other. This hollowing of the "spent" engine includes removal of the nozzle. DO NOT USE engines that still contain propellant.
17. Exhibitors who exhibit a rocket using a size E engine or larger will be required to provide National Association of Rocketry (NAR) membership number on the exhibit information sheet.

Alternative Skins (ages 14 and up)

Alternative skins are an advanced construction technique that allows the builders of Model rockets display maximum design and creativity in their models. Alternative Skins are thin coverings over a supporting skeleton that serve as the finish of a rocket as opposed to painting.

Construction and Operating Rules:

1. Use of alternative skins used for model aircraft is permitted on rockets of original design provided adequate provisions are made to prevent the rocket from catching fire during all phases of flight.
2. When used in construction these alternative skins should not be used as primary structure for the rocket. The rocket should still be of sound design and construction to insure safety for personnel performing launch activities as well as others who are in the nearby vicinity.

Types of covering:

1. Plastic shrink type coatings used for radio control model aircraft are permitted. These can be obtained from various manufacturers and hobby suppliers.
2. Other types of fabric coverings such as cloth types using coatings for stiffness are permitted as long as all of the rules set forth above are met.

Quality of Finish:

When the above finishes are used, the following judging criteria will apply in addition to those for judging other rocketry divisions.

1. Seams and transition areas will be uniform and even when they are needed in the construction.
2. Gaps and holes are not permitted in the covering especially where the fins or other stabilizing devices meet the main body of the rocket.
3. Omissions of these skins from the bottom of the rocket is permissible. Paints and other types of coatings currently used for rocketry may be substituted in these areas.
4. Alternative skins in this section may be used in conjunction with paints on the rocket. However, care shall be taken to insure that edges of the alternative skins will not be peeled off in flight.

Champion and Reserve Champion exhibits will compete for Grand Champion and Reserve Grand Champion.

High Power Rocketry Guidelines

Propose: To allow for improved safety and judging of rockets that meet the following requirements:

1. 4-H members must be currently enrolled in the 4-H Aerospace program to exhibit in this division. Exhibitors must be at least 15 years of age by January 1 of the current year.
2. The NAR High Power Rocket Safety Code applies to the construction and launching of all rockets displayed in this division.

6. In addition to the information packet completed for all rockets, a high power information form is to be completed and placed inside the information packet.
7. If a safety violation is noted by the judges, superintendent, or other staff, the exhibitor's rocket, at the judges discretion, will receive a participation ribbon. All information necessary will be given to the NAR and TRIPOLI for investigation and possible revocation of membership.
